Four Amsterdam Dental Group Specialists Named *Philadelphia Magazine's* Top Dentists™ 2017 - Prosthodontics

February 21, 2017 – Philadelphia/Paoli, PA – Amsterdam Dental Group, a leader in periodontal prosthesis and periodontics, is pleased to announce four of its dual-trained dental specialists have been named *Philadelphia Magazine's* Top Dentists™ 2017 – Prosthodontics. Trained in periodontal prosthesis and periodontics, Drs. Harold S. Baumgarten, Howard P. Fraiman and Jeffrey S. Ingber are all previous awardees, and the practice's newest associate, Dr. Caleb J. Cross was named for the first time.

According to *Philadelphia Magazine*, each year the publication sends letters to dentists throughout the eight-county area inviting them to nominate up to three peers for Top Dentist in each dental specialty and thousands of votes are received annually. These peer nominations are then reviewed by an advisory board made up of 10 dentists, chosen for their credentials and the high number of votes they received, who together name the resulting list of 20 Top Dentists in each specialty.

These awards are the most recent accolades received by Amsterdam Dental Group and its professionals. Drs. Baumgarten, Fraiman, Ingber and Cross along with general dentists, Drs. M. Barry Moskowitz and Fedele Musso, are highly regarded in the local, national and international dental community, frequently asked to lecture and take advisory board positions within their respective specialties. All graduates of the School of Dental Medicine at The University of Pennsylvania, they maintain close ties with the alumni community and most hold active roles in various academic departments.

Founded in 1948, Amsterdam Dental Group provides treatment for a full range of cosmetic, restorative and periodontal cases including the most complex issues. With offices in both Philadelphia and Paoli, PA, Amsterdam Dental Group provides state-of-the-art treatments using digital imaging, computerized tomography, dental implants and the newest advances in dental materials, including the latest in computer guided implantology and digital dentistry.
